

## Who is managing your database?

## What if it is not accessible?

## How good are your backups?

With over 10 years of experience, LSG Solutions can solve your problems, getting you senior-level coverage for less than your current DBA burdened cost.

LSG Solutions' Database Remote Control service is a continuous review of your Oracle (production) environment with the paramount goal of proactive identification and elimination of factors that tend to result in operational faults.

## Database Remote Control

- Full DBA Solution
- Proactive management designed to reduce downtime
- System monitoring, reporting, escalation notification, issue tracking, and change management
- Fixed Cost
- Service Level Agreements
- Expansive depth and breadth of Oracle experience
